

*ANALYSIS OF REGIONAL POLITICAL ATTITUDES
AT THE END OF THE THIRD TERM*

Veronika Kainzova, Jan Zavodny Pospisil
Moravian University College Olomouc, Czech Republic

The paper deals with the results of standardized interviews with the directors of regional offices and the subsequent survey among regional representatives, which was implemented in the period from December 2011 to February 2012. The obtained results of the research are focused on the area of activity of regional governments and regional authorities in the country. The research should contribute to the knowledge of the regions activities in the Czech Republic, which are in the field of Social Sciences Researchers neglected. Results of the research are focused on two aspects, first to the research opinions, attitudes, work background, activities and self-assessment of the regional representatives of the Czech Republic and, secondly, on the effectiveness of the regions as such to find a model which should measure effectiveness of regions. The project is aimed primarily to find a model of efficiency, but it solves also the questions of the policy at the regional level.
