Abstract

Nowadays, technology enhanced learning, e-learning, distance education, and blended learning becomes very popular recently. They are used intensely in modern daily life and modern education because of facilities which they have provided. Learning Management System (LMS) is a framework for sender and receiver. Moodle is the most used one which is a PHP based and open source LMS. It lacks the ability to meet the demands of the institutions which has large scale users. Therefore, administrators solve this problem off one's own bat. This research proposed a simple and effective solution.
